

Change Summary for SFM windows v7.01.0083

We have retained the menu options but the main screen has been given a new look.

To upgrade from any v6 to v7 is a quick and simple process. If you haven't already ordered your v7 upgrade then please see the website for an order form and fax, post or email it to us.

New features of SFMv7

- Maximise / Full Screen on main screen
- Larger entry screens on transactions – Receipt & Payments
- New Audit reports - Identify User &/or Network ID for each transaction
- Special Menu access to Name Manager
- Addition of Select box to lists requiring items to be selected
 - Bank Reconciliation & Unreconciliation
 - User Account Transfers
 - Pay in Receipts to Bank
 - Draw cheques for Cash and Bank Transfers
- Compatible with our new System Manager module
- Compatible with windows 7
- Preparation for the new ePayments module – beta testing will begin in June, contact us for more details.

Features of the new System Manager module

- Create a System Manager
- Create any number of users and set up them up with their own:-
 - Log in details, name, password and permissions
- Assign Users specific permissions – Full, View Only or None.
- Create sub funds with concurrent access with the main fund.
- New report to list all receipt, payments and transfers entered with user, date and time details.
